Summary

Full-stack developer and Computer Science undergraduate building web applications with Next.js, React, and Python. Project experience spans authenticated team workflows, offline-first civic reporting, and AI-assisted study planning, with a focus on database design and practical product features.

Education

KIET Group of Institutions — Ghaziabad, India
Bachelor of Technology in Computer Science; CGPA: 8.3/10 — *2024 – 2028 (Expected)*

Technical Skills

Languages: Python, C, C++, R*, Bash, Java, JavaScript, TypeScript
Frameworks: TensorFlow*, PyTorch*, JAX*, scikit-learn, NumPy, Pandas, PySpark, LangChain, LlamaIndex, RAG, Graph RAG, CrewAI, LangGraph, LangExtract, A2A Protocol, MCP, LoRA & QLoRA, Hugging Face*, AutoML Frameworks, n8n, OpenCV
Developer Tools: Data Structures and Algorithms, Machine Learning, Deep Learning, Video and Image Processing, Computer Vision, NLP, Generative AI, LLM Pretraining and Fine-Tuning
Database Management: SQL, Excel, MongoDB, PostgreSQL, Prisma, Firebase, Supabase, SQLite, IndexedDB
Web Development: React, Next.js, Node.js, Express.js, HTML, CSS, Tailwind CSS, REST APIs
Cloud & Authentication: AWS, Docker, Git, GitHub, Streamlit, Groq API, Gemini API, JWT, NextAuth
Fundamentals: OOP, DBMS, Operating Systems, MVC Architecture

Projects

Karya – Team Task Management | *Next.js, TypeScript, PostgreSQL, Prisma* — GitHub

- Built a full-stack workspace with drag-and-drop Kanban boards, task assignments, priorities, and due dates to centralize team planning and progress tracking.
- Implemented NextAuth credentials and Google OAuth login with JWT sessions; enforced server-side team membership and role checks for task and project operations.
- Designed relational data models with Prisma and PostgreSQL, using Next.js Server Actions for task updates and Google Calendar integration to synchronize assigned tasks and deadlines.

Jansewa – Civic Issue Reporting | *React, Firebase, Supabase, Gemini* — GitHub

- Developed an offline-first reporting workflow with IndexedDB to queue civic complaints during connectivity gaps and synchronize reports when users reconnect.
- Combined Firebase authentication and Firestore status updates with Supabase image storage; supported citizen, engineer, and supervisor roles across the issue-resolution workflow.
- Integrated Gemini for issue-priority assessment and Leaflet maps for location-based reporting, giving authorities geographic context and suggested priorities for triage.

AI Study Coach | *Python, Streamlit, SQLite, Groq API* — GitHub

- Built an AI study planner that converts subjects, priorities, and available study windows into personalized time-blocked schedules through the Groq API.
- Developed SQLite-backed session logging and an analytics dashboard for study streaks, total hours, focus trends, and CSV export; deployed the application on Streamlit Cloud.
- Separated scheduling, analytics, persistence, and UI logic into modules; added pytest coverage for analytics and database operations with automated checks in GitHub Actions.

Leadership

Pragmatic Fashion Society | *Creative Lead* — KIET

- Led branding, styling, and creative ideation for society events, aligning visual concepts and event presentation across creative activities.

Certifications & Training

Certification: AWS Certified Cloud Practitioner
Training: NoSQL Databases (Infosys); Java Spring (Infosys); Linux Fundamentals (Red Hat Academy)
